Education

Siddaganga Institute of Technology, Tumkur

B.E. in Computer Science and Engineering (AI & ML)

Sri Siddaganga PU College, Davangere

Pre-University Course (Science)

2023–Present

CGPA: 9.06/10

2021–2023

94.33%

Coursework

Operating Systems, Computer Networks, OOPS

Database Management Systems (DBMS), Cloud Computing

Technical Skills

- **Languages:** C++, Python, SQL, Bash
- **Cloud & DevOps:** AWS, Git, CI/CD concepts
- **Systems:** Linux, REST APIs
- **Tools:** GitHub, Power BI
- **AI & ML:** NLP, GenAI, RAG

Projects

Student Personal Finance Micro-Tracker Using Behavioral Insights

- Developed an AI-powered, gamified personal finance tracker tailored for students to manage irregular incomes and micro-transactions using a MERN stack and Python FastAPI microservices.
- Implemented intelligent semantic categorization using spaCy and zero-shot classification to automatically parse messy UPI strings into structured budget categories.
- Built a predictive liquidity forecasting module ("Broke Predictor") leveraging Pandas and time-series logic to compute daily burn rates and predict zero-balance dates.
- Integrated a personalized RAG-based financial advisor using Pinecone and Google Gemini for hallucination-free, context-aware financial coaching based on transaction history.
- Designed real-time gamified "Savings Sprints" using Socket.io and Redis-based distributed locking for concurrent multiplayer state management.

React, Node.js, Python, FastAPI, Pinecone, Redis

OmniSight: Attendance Management System with Face Recognition

- Developed a cloud-based attendance management system using facial recognition to automate attendance tracking and prevent proxy attendance.
- Integrated AWS Rekognition for real-time face detection and biometric verification, enabling accurate student identification.
- Designed and implemented secure role-based access control (RBAC) with Flask APIs, DynamoDB storage, and Bcrypt-based authentication.
- Deployed the full-stack application on AWS EC2, leveraging S3 and DynamoDB for scalable image storage and attendance record management.

Next.js, Python Flask, AWS, DynamoDB

Achievements

- Second Runner-up Byte Surge Coding Contest (Browse Event), SIT.
- Solved 230+ Data Structures & Algorithms problems in C++ and SQL problems on LeetCode.
